

## **Chapter 8**

### **Pyrotechnics**

#### **8-1. Introduction**

a. This chapter provides the annual pyrotechnic training requirements for the units listed below. The tables at the end of this chapter provide the total training requirements and notional training strategies by type unit. The notional training strategies listed in the other chapters of this pamphlet do not necessarily coincide with those reflected in this chapter due to ammunition constraints.

b. The objective of this chapter is to assist ammunition managers in forecasting pyrotechnic requirements and to provide guidance for the unit trainer in the suggested authorization of pyrotechnics.

c. Existing ARTEP's and MTP's were considered in the development of the following pyrotechnic requirements. Units were grouped according to like-type training missions and the intensity of field training in which they would be expected to participate. This resulted in the following unit groupings:

(1) Group *I*.

- (a) Armor.
- (b) Infantry.
- (c) Cavalry.

(2) Group 2.

- (a) Air Defense Artillery.
- (b) Aviation.
- (c) Combat Engineer.
- (d) Field Artillery.
- (e) Military Police.
- (f) Chemical Units.

(3) Group 3.

- (a) Adjutant General.
- (b) Finance.
- (c) Medical.
- (d) Military Intelligence.
- (e) Ordnance.
- (f) Other Engineer.
- (g) Quartermaster.
- (h) Signal.
- (I) Transportation.
- (j) Transportation Aviation Maintenance Units.
- (k) USAR Training Battalion (TRC D).

#### **8-2. Resourcing**

a. Units are resourced as shown in the following tables to support field exercises at different TRC levels. Commanders may desire to use more or less pyrotechnics than what is indicated for a particular level of exercise. However, the total annual requirement that a unit may receive, as shown in

the far right column, will not be exceeded during the training year. Headquarters and Echo Companies are to be considered in the total battalion allocation as are OPFOR requirements, and any attachments (i.e., Engineers). Pyrotechnic requirements for NTC have been resourced separately and are not a part of the unit's annual requirements as provided herein. Chemical units are resourced as indicated in tables 8-13 and 8-14. Explosive Ordnance units are resourced as indicated in table 8-19.

b. Specialized pyrotechnics such as Hoffman charges, ATWESS charges, M80 blast simulators and vehicle launched smoke grenades are listed with the weapon system to which they pertain and can be found with the appropriate weapon system in this pamphlet.

### **8-3. Requirements**

Pyrotechnic requirements are listed in tables 8-1 through 8-19. Units classified as USAR Training Battalions are to use table 8-18. In order to calculate pyrotechnic requirements for the year, the unit identifies its grouping as outlined in paragraph 8-1c. Above, determines its TRC and enters the appropriate table. Separate companies are considered as those who are not a part of a TO&E battalion or are required to separate in an isolated manner due to geographical location. Requirements shown in the far right column of the table are the total annual requirements for the battalion or separate company. Unit trainers must subdivide these resources among their subordinate units as the training situation dictates.

**Table 8-1**  
**Annual Pyrotechnic Requirements Group 1: IN/AR Battalion (TRC A)**
