

NOTICE (13 May 2011) - ALMS STATUS UPDATE - DATA MIGRATION TO ALMS 2.0  
COMPLETED

ALMS version 3.0, fielded 15 March, experienced technical problems resulting in unacceptable performance. DLS reactivated the previous version, ALMS 2.0, on 7 April. All enrollment and training completion data created in ALMS 3.0 was retained and inserted into the ALMS 2.0. The last portion of this effort (posting completions) was completed on 11 May, 2011. Personnel should now be able to view all their ALMS completions, including those completed in the March 15 - April 7 timeframe. If your ALMS training record does not properly show completions, please provide the details, including a copy of your completion certificate if available, using a trouble ticket via <https://athd.army.mil> in the "Ask a Question/Submit a Comment" tab. ALMS Technicians can view training history details in the database and upon verification can restore proper credit.
